

Tithi Packers -- Warning

A problem needs attention before it affects bookings or customer experience.

GENERATED
30 Sept 2026,
12:47 pm

CRITICAL

API latency is repeatedly high

12 requests crossed the safe latency limit and Redis latency is high. Render bandwidth is also approaching the daily safety limit.

Current Signals

Live values captured when the warning was generated.

API FAILURES 3	SLOW APIS 12	TRAFFIC 15 MIN 310
MONGO connected	REDIS connected	SEVERITY critical

Recommended Action Plan

#	ACTION
1	Check Render logs for slow API route stack traces.
2	Check Upstash command usage and Redis latency.
3	Review top slow routes and temporarily increase cache TTLs if traffic spike continues.

Delivery note

This alert is automatically sent to the same admin email recipients used for booking create and booking update notifications.
